YOUR MONTH AT A GLANCE

Bodyweight Full Body · Low-Impact Cardio · Floor Mobility · Bodyweight Legs · Complete Rest · Bodyweight Push & Pull · Active Recovery · Bodyweight Core · Bodyweight Circuit · Low-Impact Intervals

START HERE

Every session uses your own bodyweight and the space of a bath towel. No mat, no bands, no dumbbells, no chair required. The plan rotates push, pull-style, lower-body, core, and low-impact cardio work so nothing is neglected despite the absence of equipment.

WHO THIS IS FOR

Adults training in hotel rooms, small flats, or shared spaces, and anyone who wants a plan that never depends on a purchase or a gym.

EQUIPMENT

Nothing at all. A towel or carpet makes floor work more comfortable but is not required, and a wall is used for support in several exercises.

INTENSITY GUIDE

RPE 1-2	Rest or very easy movement
RPE 3-4	Easy, conversation feels natural
RPE 5	Moderate, working but controlled
RPE 6	Challenging, never sharp or unstable

HOW TO USE THE CALENDAR

- Follow the days in order and warm up for five minutes each time.
- Every exercise has a floor and a standing version so the session works in any space.
- Keep the RPE as a ceiling, keep rest days as written, and resume where you left off after a missed day.

FIVE-MINUTE WARM-UP

1 minute	March or step-touch in place	Settle into an easy rhythm
1 minute	Arm circles and shoulder rolls	Loosen the upper body
1 minute	Hip circles and easy hip hinges	Move the hips comfortably
1 minute	Half-depth squats and heel raises	Keep the depth pain-free
1 minute	Faster march with light knee lifts	Finish a little warmer

Warm-up, modifications & progressions

WARM-UP BEFORE EVERY TRAINING DAY

Minute 1	March or step-touch in place	1 minute	Raise body temperature without rushing
Minute 2	Arm circles and shoulder rolls	1 minute	Free the shoulders and upper back
Minute 3	Hip circles and easy hip hinges	1 minute	Prepare hips and comfortable depth
Minute 4	Half-depth squats and heel raises	1 minute	Mobilise ankles and lower legs
Minute 5	Faster march with light knee lifts	1 minute	Finish warmer while breathing steadily

BEGINNER MODIFICATIONS

- Keep wall push-ups for the whole month; height matters more than the name.

- Replace reverse lunges with split squats holding a wall.

- Reduce every round by 2-4 repetitions or shorten holds by 10 seconds.

- Do low-impact cardio at a marching pace with no skaters.

- Split any session into two blocks in the same day.

OPTIONAL PROGRESSIONS

- Lower the push-up height one step at a time: wall, counter, knees, floor.

- Add one round before adding repetitions.

- Slow the lowering phase of squats and push-ups to three seconds.

- Move from double-leg to single-leg glute bridges once form is stable.

- Progress only after every repetition stays steady and pain-free.

PRACTICAL MOVEMENT SUBSTITUTIONS

Floor work	Use a standing version or stable support
Lunges	Choose supported reverse toe taps or sit-to-stands
Brisk intervals	March comfortably with longer recovery
